Do I want you people watching over my 401k? Hell no!!!! This sounds like a typical progressive stunt to me to gain hold of all our finances and use it to serve your own ends! The very first and last thing I would ever trust on this earth, is the Feds. Taking our savings is a way for you to get your hands on more money because you are broke. You have exhausted every avenue and you have us so deep in debt it is scary to think that we may not see the light of day. How about if you just cut your spending, fire a few thousand of the unnecessary people on the Obama payroll, that should help some.

I can just see you people with all the 401ks, drooling over what you got your hands on. Then, figuring out how long each of us will live and then pay us a monthly payment (no doubt small at that). Then, when we die, guess what, you keep your hot greedy hands on it.

Our 401k was not set up just to give us a monthly payment, but for other things as well. And when you take control of it away from us, we will no longer have those options. You will be doling out just the minimum so you can keep more for yourself.

Forget it, we want nothing to do with any of you and don't think you will get your hands on our 401k because we will never allow it to happen. Tell Geithner and all his little playmates at the Treasury to Go To ----!

The Dixons
